

MI-CIP 3,6kV 1250A Manual

## MAIN FEATURES

The changeover disconnecter type MI-CIP has following features:

- Disconnecter with 2 positions: closed – open & earthed
- Endurance class M0; 1000 C-O (close-open cycles)
- Standard execution: 3pole. Also available as 1p, 2p, 4p, 5p or 6p execution.
- On demand : mounting of switch possible in each position

## ACCESSORIES (See also BR080 for more information)

- Beside standard execution, other types of auxiliary contacts available:
  - Heavy DC-currents
  - Very low currents (e.g. PLC-applications)
  - Positively driven contacts (IEC 60947-5-1)
  - IP67 execution
- Electro-mechanical interlock (100% ED) standard in several supply voltages:
  - 24, 110-125, 205-220 VDC
  - 230 VAC
  - Standard execution = interlocking without voltage supply
- Standard motor drives available, type D or M in several supply voltages:
  - 24, 110, 125, 220 VDC
  - 230, 3x400 VAC
  - Control system standard included and mounted on the disconnecter
  - Manual emergency lever included
- Shaft extensions and removable operating levers for manual disconnectors
- Key or padlock interlock
